Subject: FW: Two Pre-CERCLA screens
Attachments: VBI70_BrightonBlvd PCE_CombinedRpt_EPASigned.pdf

Hello Steve:

David forwarded two pre-CERCLA screens. The National Western Complex will need a Preliminary Assessment with limited sampling. I attached the report. In short, the reason for sampling is possible vapor intrusion to structures within the site and residences close to the site. The next step is to perform a preliminary assessment with limited sampling. This is a step that David and others will perform. I asked him to keep me informed of the preliminary assessment activities. I plan to inform the CAG about these results during the September meeting.

Let me know if you have additional questions.

Jesse

Subject: Two Pre-CERCLA screens

Hi Jesse: CDPHE recently completed the two pre-CERCLA screens requested. I've attached them both. We are NFRAPing one, and doing a Preliminary Assessment with limited sampling for the other. Please feel free to follow up with Alex Hedgepath (cc'd) or myself after you've had a chance to read them.

Thanks,
David
